

An Exceptional Lab Partner

NDX Green has been servicing the dental community for more than 43 years. Our team has established many personal relationships with clinicians locally and nationwide. We take pride in these partnerships as we strive to improve the success of their practices and the lives of their patients.

NDX Green offers exceptional service from the friendly voice answering your call to the highly trained technical staff with an average dental experience of more than 28 years. Staff dentists are also available for troubleshooting or treatment planning difficult cases and can offer advice on chairside procedures.

We are committed to ever-advancing technology and have extensive experience with digital design and milling. In addition, our implant specialists can assist you with treatment planning, case design, cost estimates and can even loan you the tools to complete your case.

Twenty CDTs and a highly trained team of technicians are responsible for ensuring consistent, quality restorations, delivered on time. Our NDX Green team has the experience, resources and commitment to meet your needs.

“

I have been a part of NDX Green for almost 40 years and customer service is always at the top of our priorities. We strive to develop a true partnership by customizing the needs of the dentist and their patients. I welcome the opportunity to build that relationship with you and your staff.”

Kim Thomas, CDT | General Manager

Meet Our Family!

We believe that the key to a great relationship is to make our doctors feel like they are a part of our family. Experience the open communication, personalized service and consistent quality of NDX Green.

Featured NDX Green Services

FREE TOOL LOAN PROGRAM

NDX Green keeps a stock of implant hardware and tools available to loan to any dentist restoring an implant case with the lab. Our highly trained technical staff is available to assist in treatment planning or troubleshooting a complex case.

CHAIRSIDE SERVICES

With NDX Green chairside services, our knowledgeable technicians act as liaisons between the dentist, dental auxiliary, patient and laboratory. During chairside consultations with our experts, the doctor and his/her staff will learn about the materials being used and new techniques that may apply specifically to the case in question. Drive for exceptional results and avoid wasting costly chair time by utilizing NDX chairside services.
